“What lies behind us and what lies before us are tiny matters compared to what lies within us”

– Ralph Waldo Emerson

Handwriting analysis is a very useful tool that can help you to understand the inner personality of yourself and others.

Your handwriting could reveal a lot about you even the habits that you do not realise you have or the habits that you do not want others to know.

By understanding yourself better, you could begin to make improvement and become a better and successful person.

People revealed their personality, particular habits and their fears and provide you with clues of how they would react in any situations just by the way they write. Therefore handwriting analysis would be a good way for you to understand others better.

The knowledge of handwriting analysis would give you the key to unlock the secrets that people reveal through their handwriting.

Secret # 1

Do you know someone who writes his d-stem with loops?

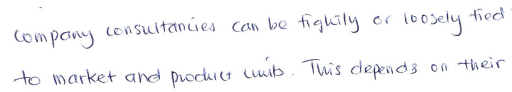

People who write their d-stem with loops are sensitive to criticism that relates to their appearance. The bigger the loops the more painful they would feel the criticism.

On the other hand, kind, uplifting and sincere comments can boost their spirit and make them really happy.

Secret # 2

Do your spouse or anyone you love write with a vertical slant such as the below?

If they do, you can expect them not to easily reveal their true feeling. In fact if someone makes them angry, they would not reveal it until a point where they would burst like a volcano and would not feel sorry about it.

You could see that they are very cool and calm even in an emergency situation.

You will need to impress them with logic and facts to get them to agree with your opinion.

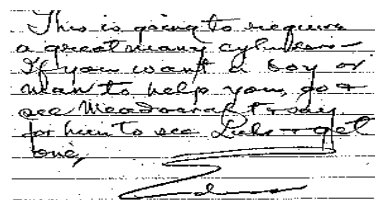

They are not impulsive people where they would think logically before making a decision for example when a salesman persuades them to buy something.

Listening to sad stories would not move them unless there is a logically explanation behind it.

You would think that they are without feeling. The truth is they do have feeling but they feel that it is not necessary to show it to you.

Secret #3

Have you ever seen a handwriting of a person who never give-up in whatever circumstances?

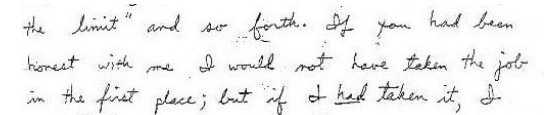

Could you see that this person is very determine, has strong willpower and very enthusiastic in achieving his goal?

This person is a persistent person especially when encountered with roadblocks and obstacles. Additional to the above this person has high self-esteem and high goals.

These are the qualities that are necessary in successful people personality. Does your handwriting revealed these success personalities in you?

Secret #4

His qualifications show that he is qualified but truthfully is he qualified to be an engineer?

The writer has a good concentration and could focus well on the project that he is doing. He has high self-esteem and high goals.

He would follow rules and he would be able to complete the project within the time given to him.

He could relate to other people's problems and would be sympathetic towards sad stories however he would still make decisions based on facts and logic.

The writer has a desire to satisfy his own curiosity. He could take ten ideas or data gathered by other people and quickly formulate it to an idea that works.
